

Monochrome

‘When used in the right place, monochrome wallpapers can turn an ordinary living space into a fabulous one, and work well as feature walls. I tend to use them as a base for bedroom schemes, and also in living rooms, to create warmth and interest. The beauty of monochrome wallpaper is that it can be dressed up easily. By using a neutral base, you can accessorise with colours that can be changed seasonally or whenever the space needs a refresh. This way, you can have a new scheme without spending a lot on redecorating.’
